PROFESSIONAL SUMMARY

Senior Salesforce Developer with 5+ years of experience building enterprise-scale applications across the Salesforce platform, with deep specialisation in Certinia PSA product development for global professional services clients. Proven ability to architect performant LWC/Apex solutions, lead multi-sprint release cycles, and drive measurable delivery improvements — including a 30% reduction in Work Planner load time and a critical production fix that enabled PwC's successful platform go-live. Experienced in cross-team technical enablement and mentoring, with a strong foundation in Salesforce security, integration patterns, and governor limit optimisation. Holds four Salesforce certifications including Platform Developer II and Agentforce Specialist.

TECHNICAL SKILLS

Salesforce Platform	Apex, LWC, Visualforce, SOQL, SOSL, Salesforce Data Architecture, Data Modeling, Triggers, Batch Apex, Queueable, Schedulable, Flows, Approval Processes, Salesforce Sales Cloud, Salesforce Service Cloud, Salesforce CPQ, Salesforce Experience Cloud
Certinia / FinancialForce	Professional Services Automation (PSA), PSA Foundation, PSA Core, Services Estimator, Output Builder, PSA Workspace, Resource Management, Billing, Project Management, Work Planner, PSA Billings, PSA Time & Expense Management
Integration & APIs	REST API, SOAP API, Bulk API, Streaming API, Platform Events, CDC, Named Credentials, OAuth 2.0, JWT, Event-driven Architecture
Frontend & Frameworks	JavaScript (ES6+), HTML5, CSS3, LWC, SLDS, Bryntum Grid, Bryntum Scheduler, Jest, React, Node.js
Security & Config	Profiles, Permission Sets, Permission Set Groups, Custom Permissions, Sharing Rules, Role Hierarchy, OWD, Field-Level Security, Validation Rules, Page Layouts
DevOps & Tooling	Git, Bitbucket (Stash), VS Code, SFDX, Salesforce CLI, Jenkins, ANT, JIRA, Confluence, Postman, Data Loader
Architecture & Quality	Governor Limits Optimization, Apex Enterprise Patterns, SOLID Principles, Performance Optimization, Multi-tenant Architecture, Code Review
Languages	Apex, JavaScript, HTML5, CSS3, Node.js

PROFESSIONAL EXPERIENCE

Senior Salesforce Developer | [Zordial Technologies, Jaipur](#) | July 2024 – Present

Project: [Certinia Implementation](#)

- Gain an understanding of Certinia onboarding, the implementation process, and the end-user journey for the PSA and Service Estimator products.

Senior Software Engineer | [Metacube Software Pvt. Ltd., Jaipur](#) | April 2024 – Jun 2026

Project: [ContinuousTech](#)

- Developed core **REST API integrations** between Salesforce CPQ and NetSuite, automating the triggering of complex, long-running billing calculations in an asynchronous architecture.
- Managed customer **data migration to Continuous Tech**, supporting data mapping, validation, and onboarding of new customer records into the Continuous Tech project environment.

Project: [Professional Services Automation \(PSA\) | Certinia \(FinancialForce\)](#)

- Spearheaded end-to-end release planning and execution** for multiple PSA product packages, owning requirement analysis, risk identification, complexity evaluation, and delivery timelines across multi-sprint cycles, ensuring predictable and on-time releases.
- Diagnosed and resolved a critical performance bottleneck in Bryntum Scheduler operating under Lightning Web Security (LWS)**, identifying that LWS's Proxy-based isolation layer was intercepting deep internal object mutations within the scheduler engine, and eliminated the root cause by overriding native **Map** and **Set** with custom Polyfills to bypass Proxy wrapping.
- Achieved **~30% performance improvement** in the Work Planner UI, a core module for resource scheduling, project planning, and staffing operations, by optimizing frontend performance and reducing load time.

- **Resolved a production-blocking issue for PwC** ahead of their go-live deadline, preventing a high-stakes deployment failure and receiving formal recognition from the **CTFO of Certinia** for the impact of the fix.
- **Architected scalable technical solutions** by evaluating multiple design approaches for complex PSA requirements, selecting optimal patterns that balance performance, maintainability, and Salesforce governor limits — reducing rework and future technical debt.
- **Led cross-team technical enablement**, guiding parallel development teams through advanced LWC/Apex challenges, architectural decisions, and complex debugging sessions, significantly reducing escalation response time and unblocking delivery.
- **Mentored Graduate Engineer Trainees (GETs)** through structured Salesforce development sessions, accelerating onboarding timelines and building team capability in PSA domain knowledge and Salesforce best practices.

Software Engineer | Metacube Software Pvt. Ltd., Jaipur | January 2021 – March 2024

Project: Professional Services Automation (PSA) | Certinia (FinancialForce)

- **Contributed to PSA Core, Output Builder, Services Estimator and PSA Workspace managed package development**, delivering new product features shipped to global PSA customers across professional services verticals.
- **Led Visualforce-to-LWC migration** for multiple critical legacy pages, re-architecting the UI to modern Lightning Web Components to improve responsiveness and eliminate technical debt.
- Developed **enterprise-grade Apex classes, Triggers, and Batch jobs** following **Apex Enterprise Patterns (Service, Selector, Domain)** to enforce separation of concerns and maintain 95%+ test coverage.
- Built and optimized **high-performance LWC components (using Bryntum Grid and Scheduler)** capable of rendering and interacting with large data volumes, directly enhancing the usability of resource-heavy scheduling views.
- Managed complex **Salesforce security and sharing models**, including Permission Sets, Sharing Rules, and OWD, to satisfy stringent enterprise data access and compliance requirements.
- Automated deployment processes by implementing custom **Ant build targets** within VS Code, significantly accelerating developer iteration cycles and improving CI/CD efficiency.
- **Guided and mentored Graduate Engineer Trainees** through daily technical coaching, Salesforce development training, and structured discussions, accelerating their onboarding and contribution timelines.

Graduate Engineer Trainee | Metacube Software Pvt. Ltd., Jaipur | November 2020 – December 2020

Project: Salesforce Onboarding & Training

- **Completed intensive 2-month Salesforce onboarding**, mastering Apex, LWC, SOQL, data modeling, security model, and development best practices, enabling immediate contribution to production projects.

AI Prompt Engineer | Remotasks & Outliner | Oct 2023 - Jan 2024

- **Enhanced AI performance:** Utilized problem-solving skills to ask targeted programming/coding questions, leading to improved AI responses on various projects.
- **Data-driven optimization:** Analyzed and evaluated AI responses, providing better alternatives and driving continuous improvement.
- **Expertise in prompts:** Designed effective prompts to guide AI towards specific goals and desired outputs.

PERSONAL PROJECTS

Salesforce Permission Visualizer — Apex · LWC · SOQL · JavaScript · github.com/rupesh0/salesforce-permissions

- Utility app consolidating object-level and field-level permissions across Permission Sets and Profiles into a single unified admin view, solving a common Salesforce admin pain point.

Portfolio Website — React · HTML5 · CSS3 · JavaScript · rupesh0.github.io/portfolio-website

- Responsive, mobile-first personal portfolio built from scratch in React, showcasing professional work and projects with a modern UI.

Shopping App in Salesforce — LWC · Visualforce · Apex · Node.js · github.com/rupesh0/shopping-app

- Full e-commerce app built on Salesforce twice — first in Visualforce, then re-architected in LWC — demonstrating product listing, cart management, and order flow using Apex and SOQL.

CERTIFICATIONS

- **Salesforce Agentforce Specialist** — Salesforce (2025)
- **Salesforce Platform Developer II (PD2)** — Salesforce (2024)
- **Salesforce JavaScript Developer I (JD1)** — Salesforce (2023)
- **Salesforce Platform Developer I (PD1)** — Salesforce (2021)
- **Hackerrank JAVA (Basic)**
- **Hackerrank Javascript (Basic)(Intermediate)**
- **Hackerrank Problem Solving (Basic) (Intermediate)**

ACHIEVEMENTS & RECOGNITION

- **Metacube Star Innovator — Q1 2025:** Recognised company-wide for outstanding innovation and technical contribution.
- **Metacube Hero in the Rank — Q1 2024:** Awarded for exceptional performance and delivery excellence.

- **PwC Go-Live Critical Fix:** Received formal recognition from the CTFO of Certinia for resolving a production-blocking issue that enabled PwC's successful Certinia PSA go-live.

EDUCATION

Bachelor of Technology (B.Tech) — Information Technology | CTAE, Udaipur (MPUAT) | 2016 – 2020 | CGPA: 7.58

- **GATE 2020 Qualified:** Cleared the Graduate Aptitude Test in Engineering (GATE) in the Information Technology stream.
